FOR SUSTAINABLE, HEALTHY AND MODERN LIVING.

www.nishplas.eu

The natural and sustainable wall and ceiling coating made from cotton.

With Nishplas, you are choosing a practical and modern alternative to wallpaper, plaster and paint. Developed in years of experience for the interior and exterior design of hotels, schools and restaurants.

The wide range of decorative and sustainable Nishplas wall coatings is not only a creative and practical alternative to wallpaper, plaster and paint, but also addresses the global scarcity of resources. The wall plaster is made from textile and plant fibres such as cotton and silk, which offer many advantages over traditional wallpaper and plaster products.

Our Nishplas cotton plaster is eco-friendly, sustainable and breathable. This ensures a healthy, odorless indoor climate where you can take a deep breath without worry. Our products also offer significantly higher thermal and sound insulating characteristics than conventional plaster paints.

Nishplas provides excellent thermal insulation. Our cotton plaster actively reduces energy and heating costs.

In times of rising energy costs, insulation is becoming increasingly important. The innovative Nishplas insulation system protects your home from the cold in winter and the heat in summer.

The wide range of colours, patterns and textures covers all possible needs in terms of aesthetics, creative techniques, current colour trends and compatibility with your individual interior design.

Benefits of Nishplas:

The wall plaster is made from textile and plant fibers such as cotton and silk, which offer numerous advantages over traditional wallpaper and plaster products.

Easy Application

Our Nishplas products are both cost-effective and time-saving. Easy and quick to apply, they are suitable for a variety of surfaces – from tiles, glass and wood to plastics, limestone, brick, polystyrene and cement.

Excellent Insulation

Thanks to a coating thickness of 3 millimetres and the outstanding insulating properties, the walls retain heat and provide thermal insulation of up to 40 per cent in the colder months. The same applies to the heat in summer. The composition of cotton, natural fibres, mineral stones and natural adhesives also ensures excellent sound insulation.

Long Durability

Nishplas cotton plaster is extremely durable and can easily last up to 10 years.

Healthy Living

By choosing Nishplas cotton wall coating, you are not only choosing an eco-friendly product, but also a healthy one, as our cotton plaster is odorless and free from chemicals and allergens. Just the healthy indoor climate you want for your home!

Great Variety

With Nishplas you don't have to compromise on aesthetics, creative techniques or matching your existing interior design. You are guaranteed to find what you are looking for in our wide range of colours, patterns and textures.

Nishplas is ...

■ ... a genuine all-rounder:

The wall coating can be easily applied to a variety of surfaces. You can even remove our cotton wall coating from the wall and reapply it to another area.
